ABANDONMENT OF SEPTIC TANK

1) Contents of septic tank must be pumped from tank and removed to appropriate depository. Pumping into public sewer system or onto an open area is not an acceptable procedure.

2) Septic tank lid must be removed or crushed in.

3) Leach line and inlet must be plugged, though leach line and leach field may be left in place.

4) Three 4" diameter holes should be put in the bottom of the septic tank to allow for proper drainage.

5) Septic tank must be filled with approved granular material.
