

CITY OF CAMPBELL
Community Development Department

NEW SINGLE-FAMILY RESIDENTIAL CONSTRUCTION
BUILDING APPLICATION GUIDE

(Download at <https://bit.ly/newresappguide>)

This Building Application Guide (“Guide”) is intended to facilitate the submittal of a building permit application to the City of Campbell Building Inspection Division. Please note that there are specific Guides for different types of permitted work (e.g., construction of an office building, commercial tenant improvements, demolitions). If you are unsure of which Guide to refer, please visit the Building Application Guide webpage at <https://bit.ly/buildingappguides>. If you need additional assistance, please contact the Building Inspection Division at (408) 866-2130 or building@campbellca.gov, or visit us at City Hall.

TYPICAL JOB TYPES

This Guide is to be used for new single-family residential projects such as the following:

- **New Single-Family Residential Dwelling(s)**
- **Addition and/or Remodel to a Single-Family Residential Dwelling**
- **New Detached and Attached Accessory Dwelling Unit (ADU)**

Note: If you are only remodeling the interior of your home or converting an existing room or garage to an ADU please refer to the Single-Family Residential Remodel Building Application Guide (see <https://bit.ly/resremodelappguide>).

DIGITAL SUBMISSION REQUIRED

The City of Campbell utilizes an online permit system called MyGovernmentOnline (“MGO”). **All applications for a building permit must be electronically submitted through the MGO system**, accessible at <https://bit.ly/buildingmgo>. Before you submit an application for the first time, you must create a user account. For more information, please visit the City’s Application Center at <http://bit.ly/campbellappcenter>. MGO also offers a customer service support line at (866) 957-3764 if you need assistance in creating a user account and/or navigating the system. Questions related to the application submittal requirements specified by this Guide should be directed to the Building Inspection Division at (408) 866-2130 or building@campbellca.gov. If you require accommodation, there is a public kiosk in the Community Development Department that you may use to submit an application through the MGO system and/or create a user account. However, as noted further in the Guide, all application materials must be provided electronically; if you wish to use the public kiosk you must bring your application materials on a USB flash drive. For security reasons, application materials may not be downloaded or emailed to the kiosk computer.

DETERMINATION OF A NEW HOUSE

The City of Campbell’s adopted Building Code provides [specific thresholds](#) for when a single-family residential “addition and remodel” project shall instead be classified as construction of a “new dwelling using portions of the original structure”, subject to all Zoning and Building Code standards applicable to construction of a new house. To ensure your permit application is correctly processed, the City has implemented a preliminary screening process. If your addition and remodel project exceeds 50% of the existing home’s gross floor area (inclusive of living areas and garages), you are required to submit a “New House Determination” request to the Building Inspection Division **prior to submitting a building permit application** through the MGO system. If upon submittal of a “New House Determination” request, your addition and remodel project is classified as a “new dwelling using portions of the original structure” you must submit application materials for construction of new house as itemized below. Please refer to the Miscellaneous Requests Application Guide (see <https://bit.ly/miscappguide>) to obtain a determination.

LAND USE PERMIT APPROVAL

Construction of a new single-family dwelling or an addition and/or remodel to an existing single-family dwelling may require prior approval of a land use permit (e.g., Site and Architectural Review Permit). Please visit the Planning Application Checklists webpage at <http://bit.ly/appchecklists> or contact the Planning Division at (408) 866-2140 or planning@campbellca.gov for more information. You will generally be unable to apply for a building permit until you have secured Planning Division approval. However, the Building Official may allow submittal of a building permit application prior to a land use permit being approved on an “at-risk” basis in certain circumstances.

Please note that Conditions of Approval imposed by a land use permit may require revisions to construction plans resulting in additional review time and cost if a building permit application is submitted “at-risk”. Additionally, when submitting an application for a building permit, it is imperative that the construction plans substantially comply with the project plans approved by a land use permit. Significant deviations to design, site layout, or building size may only be approved by the decision-making body (e.g., Planning Commission), which will require submittal of a new land use permit application. If you are unsure whether a revision may be considered significant, please contact the Planning Division prior to submitting a building permit application.

OWNER BUILDER DECLARATION

The California Business and Professions Code allows owners of residential properties to act as their own contractor under certain conditions. If you are thinking about acting as an “owner-builder”, there is important information you need to consider before pulling a permit. In compliance with State law, the City has prepared an [informational package](https://bit.ly/ownerbuilderform) (see <https://bit.ly/ownerbuilderform>) that helps explain some of the legal implications of acting as an “owner-builder” for your project. You will need to sign and submit disclosure forms as part of your permit application if you wish to act as an “owner-builder”. Please note that a Limited Liability Company (LLC) cannot be an “owner-builder,” a licensed contractor is required.

WASTE MANAGEMENT PLAN

The California Green Building Standards Code (CALGreen) requires that 65% of all non-hazardous construction and demolition waste be diverted from landfills through reuse (salvage) and/or recycling, through preparation of a Waste Management Plan (WMP). This requirement applies to all non-residential projects as well residential projects that include additions, alterations, or demolitions. The City has contracted with the [Green Halo Systems](#) to review and monitor compliance of project WMPs. Participation is mandatory as the City will no longer be accepting WMPs outside of the Green Halo system. Please review the [City’s Green Halo Waste Management Plan Handout](#) (see <https://bit.ly/campbellwmp>) for further information.

MULTIPLE SINGLE-FAMILY DWELLINGS / SUBDIVISION

Development of multiple single-family dwellings approved in conjunction with or subsequent to approval of a Tentative Map must be separated into two distinct permit reviews for the construction phase:

- A permit for construction of *each* dwelling; and
- A separate permit for grading and associated site improvements (e.g., paved surfaces, surface/subsurface utilities, stormwater management, and landscaping).

Due to the separated scopes-of-work, the construction plan requirements specified by this Guide do not require civil engineering plans (i.e., grading & drainage plans, utility plans, stormwater management plan) or landscaping plans, since these plans are to be provided as part of the application for a Grading and Site Improvement Permit (see <https://bit.ly/gradingappguide>). Applications for these permits may be made concurrently or at different times. However, building permits for a new dwellings cannot be issued until the permit for grading and site improvements has also been issued. Additionally, an application for a Final Map must also be submitted prior to applications for building permits be accepted. The Final Map must be approved and recorded prior to any building permits being issued.

TREE REMOVAL AND PROTECTION

The City of Campbell Tree Protection Ordinance protects any Oak, Redwood, Cedar, or Ash tree measuring 12-inches in diameter or greater (as measured 4-feet above grade) on a single-family property. If your project includes removal of a “protected” tree you first must secure approval of a Tree Removal Permit (see <http://bit.ly/treeremovalchecklist>). Please note that the City of Campbell is a recognized “Tree City USA” committed to the preservation of the community’s urban

TREE REMOVAL AND PROTECTION *Continued*

forest. As such, Tree Removal Permit requests are granted only in very limited circumstances and are frequently denied due to the high threshold set by the City’s Tree Protection Ordinance. Please contact the Planning Division at (408) 866-2140 or planning@campbellca.gov for more information. Further, if the property contains a “protected tree(s),” construction activity cannot occur within the dripline of the tree(s) and protection measures consistent with the [Campbell Standards for Tree Protection During Construction](#) must be implemented.

FRONTAGE IMPROVEMENTS

Construction of a new single-family dwelling or an addition equal to or greater than 50% of the existing structure size (inclusive of living area and garage) may require construction and/or repair of public frontage improvements, such as curbs and gutters, driveways, sidewalks, street lights, street trees, street signs, and curb-ramps. Dedication of land to the City may also be necessary if the existing street right-of-way cannot accommodate the required improvements. If your project required prior approval of a land use permit or a Tentative Map, your Conditions of Approval will already identify any required frontage improvements. If no previous land use permits were required, then you are encouraged to contact the Engineering Division at (408) 866-2150 or publicworks@campbellca.gov to discuss your project.

REQUIRED APPLICATION MATERIALS CHECKLIST

Unless specifically excluded by a staff member in writing, the following Application Materials, as specified in the checklist, below, are required for a building permit application to be accepted. A designation of ‘Yes’ or ‘No’ in each row states whether the specific Application Material is required or not for the particular project type (i.e., an “Addition & Remodel,” “ADU,” or “New House”). Two columns are provided for the “New House” project type to identify whether materials are required depending if the proposal is for a single (stand-alone) dwelling or for multiple dwellings as part of a subdivision approval, as discussed on Page 2.

Upon submittal to the MGO system, a staff member will review your uploaded materials for general adequacy with the specifications stated in the table, below, as well as with the additional requirements provided in the following sections. If the required Application Materials are missing, clearly inadequate, mislabeled, or in an incorrect format, the application will not be accepted. You will be notified through the MGO system if your application has been accepted or rejected.

#	REQUIRED APPLICATION MATERIALS CHECKLIST	ADDITION & REMODEL	ADU	NEW HOUSE

				SINGLE	MULTIPLE
29.	Owner-Builder Disclosure Forms , signed by the property owner (an individual person, not an LLC) (see https://bit.ly/ownerbuilderform).	Yes, if an “owner-builder”			No
30.	Preliminary Title Report prepared by a title company registered with the California Department of Insurance .	No	No	Yes	No
31.	Acknowledgment Statement (see last page of this Guide) stipulating to certain public record, copyright, environmental, and other legal obligations and disclosures.	Yes	Yes	Yes	Yes
32.	Applicant Response Letter providing an itemized response to each plan-check comment (to be provided with the second and subsequent submittals).	Yes	Yes	Yes	Yes

CONSTRUCTION PLAN PREPARATION REQUIREMENTS

Construction Plans submitted for a building permit must adhere to the following requirements:

- Each sheet shall be digitally signed by the plan drafter. If the construction plans are prepared by a licensed architect and/or engineer, a valid electronic stamp is also required;
- Be drawn to a standard architectural and/or engineering scale (e.g., 1/4" = 1' or 1" = 20');
- Indicate the name, company, address, phone number, and email address of the plan author(s);
- Specify the date of preparation and document version (deltas);
- Include noted and graphical scales and north arrow on all sheets;
- Be produced in a uniform size (all sheets) of 24" x 36" (ARCH 'D'). Other sizes, including larger formats such as 36" x 48" (ARCH 'E') will not be accepted;
- All sheets must be “flattened” into a single layer (multiple layers generated by a CAD application program slow down the review process);
- Provide bookmarks for each plan-sheet, identifying the sheet by number and title (e.g., Sheet A0 - Coversheet);
- If scanned hand-drawn plans are provided, they must be scanned at a 300 DPI resolution (however, natively generated CAD vector drawings are highly encouraged);
- Incorporate all the required plan sheets, inclusive of architectural, civil, structural, and landscaping sheets, into a single set of Construction Plans.

APPLICATION MATERIALS SUBMITTAL REQUIREMENTS

Application materials must be provided electronically in [Adobe PDF](#) (unlocked) format only (i.e., no JPEG, PNG, DOC, etc.), **using the standardized file naming format specified in the table, below**. Please do not add dates, special characters (!, @, #, \$, %, ^, &, ", ", and *), or any other additional information to the file names. Please also ensure that the Construction Plans, inclusive of architectural, civil, structural and landscaping sheets, **are combined into a single PDF file**. Separate PDF files will not be accepted and will result in rejection of your application.

For file organization purposes, each application material must be appended with the submittal version. For example, ‘Sub. 1’ for the first submittal, ‘Sub. 2’ for the second submittal, etc. Following permit issuance, any revision to the application materials must be appended with the revision number and the scope of the revision. For example, a revision to add a new window would be labeled as “Construction Plans – (Rev. 1 – New Window)”.

REQUIRED FILE NAMING FORMAT		
<i>(label each file exactly like this)</i>		
Required Material <i>(one PDF file for each item)</i>	Submittal Version <i>(identify the submission number)</i>	Post-Issuance Revisions <i>(identify the revision number/purpose)</i>
■ Construction Plans	■ Construction Plans (Sub. 1)	■ Construction Plans (Rev. 1 –Scope)

■ Applicant Response Letter	■ Response Letter (Sub. 2)	N/A

OTHER AGENCY APPROVALS

The following additional agency approvals may be required for your project:

- **The School Districts** collect “Developer Fees” for residential construction in excess of 500 square feet. The fees are collected by the district(s) prior to permit issuance. Referral forms will be provided by the Building Inspection Division during the plan-check process. To find your school district(s), please refer to the [County Assessor website](#). Please contact the applicable district for current fee rates:
 - Campbell Union High School District – (408) 371-0960 x2044/2042
 - Campbell Union School District – (408) 341-7000 x6267
 - Cambrian School District – (408) 377-2103 x1122
 - Moreland School District – (408) 874-2900
- **West Valley Sanitation District (WVSD)** collects infrastructure and sewer fees for new construction. Payment of these fees must be made prior to permit issuance. A WVSD issued permit labeled “Copy for Building Department” must be provided to the City. Please contact WVSD at (408) 378-2407 for further information.
- **Santa Clara County Fire District (SCCFD)** approval of a fire sprinkler system requires a separate review and approval letter. Plan submittal and fee information may be obtained from SCCFD at (408) 378-4010.
- **San Jose Water Company** may require a new upsized water service connection and payment of fees if your project requires installation of a fire sprinkler system. Please contact San Jose Water at (408) 279-7900 for further information.
- **Santa Clara County Assessor** will [appraise the new construction](#). Please call (408) 299-5300 for further information.

APPLICATION FEES

Payment of an initial plan-check will be due at time of application submittal. Once your application has been accepted, an invoice with instructions for payment will be emailed to you. **Payment of the fees must be made within two (2) business days.** Failure to pay by the payment deadline will cause the application to be rejected and you will have to resubmit. Once a building permit is ready to be issued, payment of all permit fees will be required. Additional fees will be charged for each round of plan-check (and revisions). As such, every effort should be taken to ensure that application materials comply with requirements of this checklist to avoid additional plan-check fees. Please note that the City charges a 4% surcharge fee for all credit/debit card transactions. Cash or check payments may be made at the City Finance Department at no additional cost.

INSPECTIONS

Various inspections are required depending on the exact scope-of-work of your permit request. Once a permit has been issued, your MGO account will identify which inspections are necessary (note that additional inspections may be required once construction commences). Please review the [City's Inspection Handout](#) (see <https://bit.ly/inspectionshandout>) for an explanation of what each inspection entails. Inspections may be called for over the phone at (866) -957-376 or [by using your MGO account](#).

REVIEW TIMELINES

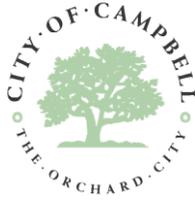

Construction plans submitted for a building permit are reviewed concurrently by the Building Inspection Division (including third-party plan-check consultant), Planning Division, Land Development Engineering Division, and the Santa Clara County Fire District. Comments from these departments will be provided at the same time upon completion of the plan review. Please allow a minimum of 4 to 6 weeks for the first plan-check and 2 to 4 weeks for all subsequent reviews.

PERMIT DEADLINES

A permit application will expire without refund of fees if the applicant fails to obtain a building permit within 180 days from the date of application submittal. Similarly, an issued building permit will expire without refund of fees if the applicant fails to pass an inspection every 180 days from the date of issuance. The Building Official may grant extensions to these deadlines prior to the expiration dates on a case-by-case basis. If an extension request is denied, a new permit application and payment of fees shall be required.

RESUBMITTALS

Plan-check comments from the reviewing departments are released to the MGO Customer Portal as they are completed. However, please do not attempt to upload revised materials until you have received confirmation from the Building Inspection Division that all comments have been provided. When revised materials are ready to be submitted, please include a detailed letter providing an itemized response to each plan-check comment, **organized by review party (i.e., Fire District, Planning, etc.)**. To upload revised materials, please review [these instructions](#) on the City's [Application Center webpage](#).

CITY OF CAMPBELL
Community Development Department

ACKNOWLEDGEMENT STATEMENT

Please read carefully. These are legally binding statements that may warrant consultation with legal counsel and/or a translator prior to signing. Misrepresentation may result in revocation of an issued building permit. Signature by the Applicant (or contractor), and Property Owner (or a duly authorized individual who may sign on behalf of a corporation, non-profit organization, limited liability company, joint partnership, homeowner associations, etc.) constitutes acknowledgment and/or acceptance of the following by all parties:

- (1) The City of Campbell is granted release to copy and reproduce electronically, in whole or in part, drawings and all other materials submitted with this permit application for the City’s regulatory, administrative, and legal functions, including sharing of information with other governmental entities and for compliance with the [California Public Records Act \(CPRA\)](#);
- (2) All notices and communications may be provided electronically via email or through the MGO system. This acknowledgement constitutes a voluntary and knowing waiver to receive a physical copy of any such correspondence;
- (3) An application for a building permit is not deemed submitted until all required materials have been confirmed received and all plan-check fees have been paid;
- (4) The contractor shall maintain their required license and bond in good standing with the Contractors State License Board and a current City of Campbell Business License during the entirety of construction activity;
- (5) A permit application or an issued building permit will expire without refund of fees if the applicant fails to secure a permit or pass an inspection within 180 days, respectively. In the event a building permit expires, the City may impose fines and/or exercise administrative remedies to compel timely completion of work. A new permit application and payment of fees shall be required to complete the work/construction;
- (6) Issuance of a building permit shall not be construed to be an approval of a violation the California Building Code or Campbell Municipal Code (CMC); a permit issued in error under such circumstance shall be considered void;
- (7) Construction activity shall occur in compliance with the time and noise limitations specified by [CMC Sec. 18.04.52](#), as well as with local and State air quality and stormwater protection requirements;
- (8) Revisions to approved construction plans must receive prior City approval. Construction performed not in compliance with approved construction plans may result in monetary and/or civil penalties and may also incur additional City requirements if the scope-of-work exceeds codified thresholds (e.g., determination of a new dwelling); and
- (9) The information submitted with the permit application is true and correct to the best of my knowledge.
